For the past few nights, my daughter has had restless nights. After being blessed with a good sleeper we couldn't figure out what was going on. Then we realized, she was almost ready to roll over, and was restless in her crib. Once she figured it out, she went back to sleeping, and we have some great videos of her rolling over!

After having 4 kids i was sure I was done. But seven years went by and got pregnant again. Of course I couldn't believe it because I was taking birth control. I was shocked, I didn't want to start over, I was scared and I didn't feel ready for a new baby. Pregnancy was tough, I had an umbilical hernia, high blood pressure, and risk of having a miscarriage. So I had to be on bed rest and then came the depression for not being able to take care of my other children of course they were very very supportive. And finally the day came which was the most difficult delivery since the epidural didn't take away any of my pain away and it was a vaginal delivery. But when you look at that beautiful face, that smile, and those eyes I could say that it was all worth it and I would do it again. I love her so much. She's 4 months now and she is my little treasure baby and everybody loves her so much. She has so much hair people think it's amazing and beautiful. I love very much.

It must be nice to be a BIG girl

Steep Falls, ME

I was shopping with my four year old daughter Olivia at a store. I really liked a dress that was on a mannequin display so I took it into the dressing room to be able to take the dress off and try it on. My daughter was talking and playing and all of a sudden she starting staring at the mannequin and calmly stated, "Lady, you have really nice breasts." I thought it was so funny and I totally agreed! They were a good size and perky. I can't believe how much little girls aspire to grow up so early but it's very sweet when moments like that happen. I also loved her observation and honesty in that moment.

My son was a premie and was hooked up to wires and monitors. The first time I got to hold him was on my Birthday, 7 days after he was born. I did the kangaroo hold, skin to skin, chest to chest. I will remember that day always (~_~)

First snow day photo

Salisbury, Ma

After the first snow, make a little snowman and stand your baby up next to it. Take a cute keepsake memory photo to capture your baby's first snow day.

Easter Blessings

There's nothing like waking up every morning to see his smiling face looking up at me. I just love watching him trying to learn to walk on his own, and watch how quickly he learns new things. I've learned to treasure what he's doing today, because tomorrow he'll be doing something new.
